

# WANTED

## Newly Diagnosed Diabetic Cats

For a pilot study to evaluate the effect of a new oral medication or placebo in diabetic cats also receiving insulin

### Requirements:

1. Untreated diabetic cats OR treated diabetic cats that have been diagnosed for less than 60 days
2. Cats must be  $\geq 1$  year of age
3. Cats must weigh  $\geq 4 \frac{1}{2}$  lbs
4. Cats must have not received corticosteroids within the previous 60 days
5. Cats must otherwise be in good health / no ketones
6. Cats must be amenable to receiving oral medications at home

Owners must be able to present their cats for 9-hour glucose curves on days -1, 7, 21, 45, 85, 112 and possibly 140.

All blood tests and evaluations, as well as the test medication and ProZinc insulin, will be provided at no charge to owners.

Owners of cats that complete the study will also receive a \$300 credit at the study veterinarian's clinic.

A limited number of cats will be enrolled.
